

Dear Colleagues,

Thank you for supporting students and families during this emotional and difficult college admission season. We sincerely appreciate your hard work, thoughtfulness, compassion, and care, especially in the coming weeks, as students learn of their admission decisions.

Our Early Action review was the most competitive in our history. We are excited about the candidates to whom we've offered admission for the incoming class, including 824 students who will be the first in their families to attend college. We hope the statistics below provide context for the pool and assist in your conversations with students, parents, and school officials. Should you have follow-up questions, please contact our office at any time.

We do anticipate spaces will become available for some deferred students in our Regular Decision review. While we do not accept additional updates, essays, or recommendations from deferred students, we do require that they submit midyear grades no later than February 15. Students can submit self-reported grades in their student portals, or you may upload them through the Common Application or slate.org, or send them to our office if electronic submission is not possible. Deferred students who wish to remain in consideration for Regular Decision must also complete the required form in their student portals by February 15.

Thank you again for all you do. We are grateful for your partnership and support.

Early Action Applications (last year)

Total number of Early Action applications: 31,143 (28,897)

Total number of VA applications: 8518 (7849)

Total number of Out of State applications: 22,626 (21,048)
